# Introduction

YourTrump is an innovative ICO project that introduces a new paradigm to the cryptocurrency market.

By using Donald Trump's Twitter follower count as the foundation for a unique pricing mechanism, YourTrump offers transparency and predictability to investors.

This project reflects Trump's social media influence in real-time, creating an efficient investment environment and offering new opportunities for generating returns.

YourTrump goes beyond the traditional cryptocurrency model, driving change in the market through real-time data-driven pricing and an innovative bonus structure.

# Problem Definition

The cryptocurrency market continues to face challenges, including uncertainty, high volatility, and inefficient pricing systems.

These issues undermine investor confidence and hinder the market's long-term growth.

Challenges with existing ICO models:

Unpredictable price movements make it difficult for investors to anticipate the difference between initial purchase price and listing price.

Lack of transparency in how prices are determined.

Complicated purchase processes and high barriers to entry limit investor participation.

# Solution

YourTrump addresses these issues with an innovative approach.

Pricing based on Trump's Twitter follower count

The pre-sale price is fixed at \$0.0284, while the listing price will be determined by the last 5 digits of Donald Trump's Twitter follower count at the end of the pre-sale period. For instance, if the follower count ends with 99999, the listing price will be \$9.9999. This provides investors with a predictable price increase upon listing.

Real-time data accessibility

YourTrump's official website offers real-time tracking of Trump's Twitter follower count and displays the projected listing price, enhancing the transparency and convenience of investments.

The real-time tracking feature allows investors to monitor follower counts directly.

The projected listing price is displayed to help investors anticipate future market value.

Bonus structure

During the pre-sale period, investors can benefit from round-based bonus rewards:

Round 1 (Days 1–14): 10% bonus on purchased tokens.

Round 2 (Days 15–28): 7% bonus on purchased tokens.

Round 3 (Days 29–42): 5% bonus on purchased tokens.

Final Round (Days 43–60): Bonus percentages dynamically adjust based on the remaining tokens, approaching 0% as sales progress.

## **Tokenomics**

YourTrump ensures stability for investors with a transparent and efficient token distribution model.

Total Supply: 1,000,000,000 \$YTP

Pre-sale Distribution: 50%

Liquidity and Exchange Listings: 20%

Marketing and Partnerships: 20%

Development and Operations: 10%

# Getting Started

Participating in YourTrump is straightforward and accessible to everyone.

Create a wallet

Download a compatible wallet like MetaMask.

If you already have a wallet, skip this step.

Load your wallet

Load your wallet with cryptocurrencies such as ETH, USDT, or BNB.

Buy and stake \$YTP

Connect your wallet to the YourTrump website, select a payment method, and purchase your desired amount of \$YTP. You can also start staking your tokens immediately.
